

2011 Philips T.I.P.S. Sheet

**For Philips Models
22HFL5662H - 26HFL5662H
32HFL5662H - 42HFL5682H**

Congratulations on the purchase of your new Philips healthcare grade television!

Please take the time to familiarize yourself with the following pages and the enclosed quick start guide. The tips pages and guide will help walk you through the set up of your new LCD. If you encounter any problems during set up please call the number on the next page for assistance.

Thank you for your purchase.

To Report a Warranty Claim:

Call 1-800-535-2459 Option 1
or
Email to dispatch@telehealth.com

We will need the following information to log your claim:

- Serial Number
- Model Number
- Description of the problem
- Shipment address or Physical location of the equipment
- Point of contact and contact information

Please note:

1. *The above models use the new Philips Master Remote (yellow) Part Number 22AV8573. If you do not have the yellow remote refer to the workaround solution at the bottom of the page.*
2. **Internal Speakers are disabled in factory default setting. To enable internal speakers press:**
Menu>Installer Settings>Audio>Loudspeaker Mute>set to NO.

- Please Set Your ESP Settings, use Zero, press OK (or E).
- Please Select Your Standby Mode Setting, arrow down to Standard press OK (or E).
- Done press OK (or E).
- Smart Install Finished press OK (or E).

USB Cloning

Cloning is now done using a USB stick instead of a clone box. Follow the instructions below and be sure to only clone like models.

- Blank USB Stick required
- Manually program first with desired settings
- Menu>Smartclone>Source> select USB
- Load TV information to USB memory stick: Select TV to USB
- Select Start: TV program information is now on USB Stick

Transfer Clone data to unprogrammed set:

- Menu>Smartclone>Source, set to USB>select Source to TV
- Select Start

Note: Allow set 3 minutes to program. Do not interrupt process until 100% complete. It is normal for set to cycle on an off during the loading cycle.

To test for completion press recall button. If Recall menu is displayed the process is complete.

**Workaround solution for using Green remote **

Use E for OK or Select button

Use A/Ch for Back button
