

GE Industrial

Imagine a building that helps you  
improve patient outcomes and  
reduce costs.

Healthcare Infrastructure Re-imagined.

# Could your infrastructure use a check-up from GE?

Better outcomes and a healthier bottom line begin with an infrastructure that is optimized for cost-effective delivery of patient care.

GE can help. Our specialists in lighting, communications, security, energy, power, and water can identify opportunities that save you money and improve building operations throughout your enterprise for new construction and existing facilities.

From germ-killing lights to intelligent nurse call systems, we offer an unmatched portfolio of innovative products and services that can be customized to meet your goals of improving patient outcomes and reducing costs.

The result? A facility that's in tip-top health and optimized to support the efficient and effective delivery of patient care.

## Lighting Re-imagined.

**With the right light in the right places, GE has solutions to help you reduce pathogens and brighten patients' outlook.**

- Kill germs and improve air quality with UVC sources from GE in high-risk areas, ducts and HVAC coils.
- Heighten patient and family satisfaction – and reduce prescription/medication errors – with more natural light in ICU, post-op, pediatrics and other key areas.
- Reduce energy and maintenance costs with energy-efficient lighting options.

## Communications Re-imagined.

**Who is needed where, by whom and why? You'll find the answers in GE's advanced nurse call platform.**

- Give caregivers more profitable time for patients with a system that is robust but easy to learn and use.
- Help enhance treatment outcomes and staff satisfaction with nurse call that meshes seamlessly with the way caregivers work.
- Manage costs with advanced technology that's easy to retrofit into your existing IT infrastructure.

## Security Re-imagined.

**Patients, staff, property and your balance sheet all deserve protection. GE helps you deliver that security – thoroughly and efficiently.**

- Reduce risks, liability and FTEs by using intelligent video from GE that can assess, record and report unusual situations.
- Help keep sensitive areas secure with GE's leading-edge access control and intrusion alarm systems.
- Blanket your facility with protection via GE's life safety solutions, including fire alarm systems, intelligent smoke detection and emergency notification signals.

## Energy Re-imagined.

**Keep your staff and equipment protected and productive. GE electrical distribution and power generation equipment does the job.**

- Stay up and running smoothly with GE's range of UPS and power quality products, as well as maintenance and warranty services.
- Revolutionary intelligent switchgear protects personnel, speeds installation and adapts to changing requirements – for long-term cost savings.
- Renewable power from the wind and sun are integral to the energy mix. GE leads the way with high-quality solutions.

## Water Re-imagined.

**Water means life. Water solutions from GE mean you can better protect lives.**

- Keep your promise of high-quality care with GE's full range of dialysis water-purification solutions.
- Control microbes in recirculating water systems – and manage your risks of Legionella and equipment failure – with water and process technologies from GE.

# Solving today's problems. Building for the future.

We understand that no two facilities are alike. That's why we bring together best-in-class resources to help your team design solutions that are customized to your unique challenges and opportunities. In fact, GE's open protocols give you the flexibility to design and customize systems that easily integrate into your building system. GE's solutions also allow efficient upgrades of existing systems reducing your capital expenses. GE offers choices and options that are simply not available anywhere else.

With GE support, you not only can improve your infrastructure – you can build a healthcare delivery system that will keep you at the forefront of patient care for years to come.

For more information on any or all of these opportunities, ask your GE representative for the details, or email [healthcaresolutions@ge.com](mailto:healthcaresolutions@ge.com).
