

Nursing Examination Rooms, Training Facilities and Lobby

Healthcare

Project Name: Seattle University
College of Nursing
Training Facilities, Lobby

Total Value: \$160,000
Location: Seattle, WA

Challenge

Unparalleled changes in health care, coupled with a profound and deepening nursing shortage, demand that nursing colleges have the most advanced learning environment available. The Clinical Performance Laboratory technology is central to the dream of the University and the College of Nursing. The center aspires to become the cutting-edge practice center in the United States.

Solution

Each of five the presentation rooms were equipped with a ceiling mounted projector and connection for computer and AV inputs. A custom roll around cart with a 32 inch LCD display securely mounted on the top surface provided additional AV support. Each exam room has two ceiling mounted cameras and a ceiling mounted microphone. At the entrance to each exam space there is a monitor to observe procedures, and a camera controller to select the camera to be viewed and a DVD recorder to record the viewed procedure. At the central core is a 40 inch LCD monitor with input selection to view any exam room or DVD recorded from any exam room. Each exam room was equipped with a paging system from a dedicated telephone at the central table.

"The nursing lab was so successful that we are now using Avidex as our audio visual design and installation consultants on all of our projects".

Michel George, Associate Vice President, Facilities Seattle University
